#### c. A brief on types of customers

IRCON has played an integral role in the creation of transformative infrastructure assets since its inception. The company has successfully executed numerous pioneering infrastructural projects, contributing to India's economic growth and enhancing its global standing. A majority of IRCON's domestic projects are awarded by government authorities, including the Ministry of Railways, the National Highways Authority of India, the National High-Speed Rail Corporation Limited, the Chennai Metro Rail Limited, the Dedicated Freight Corridor Corporation of India Limited, the Airports Authority of India, the Rail Land Development Authority, the National Capital Region Transport Corporation, and the Delhi Metro Rail Corporation, among others. Similarly, international projects are awarded by foreign government authorities, such as the Bangladesh Railway, the Sri Lanka Railway, the Algerian Railway, the Ministry of Transport, Malaysia, and the Ministry of External Affairs. In order to secure significant and high-value projects in both the domestic and international markets IRCON actively participates in competitive bidding processes.

IRCON has completed a total of over 401 domestic projects and 128 international projects for diverse clients, maintaining a steadfast commitment to client satisfaction and timely delivery of high-quality outcomes. This unwavering dedication to excellence has been a cornerstone of IRCON's operations.

### 4. Does the entity have an anti-corruption or anti-bribery policy? If yes, provide details in brief and if available, provide a web-link to the policy

IRCON follows the Central Vigilance Manual, a comprehensive guide that provides principles, procedures, and best practices for combating corruption and bribery. It serves as a valuable resource for IRCON, outlining measures to prevent corruption, conduct investigations, and take disciplinary actions. The manual emphasizes transparency, integrity, and accountability, and guides on implementing anti-corruption policies and internal control systems. It addresses corruption risks in various areas, such as procurement and financial management. By following the manual, IRCON aims to establish a strong anti-corruption framework, build public trust, and foster a culture of integrity within the organization.

Apart from this, the Company also has a Fraud Prevention and Detection Policy in place for any fraud or suspected fraud involving employees of IRCON as well as representatives of vendors, suppliers, contractors, consultants, service providers or any outside agency/agencies doing any type of business with IRCON and a Whistle-blower Policy meant for employees to raise any ethical issues within the organization.

Additionally, the Company has adopted a Code of Conduct for all the Board Members and Senior Management and Whole-time Directors. As of now, IRCON is exploring the implementation of an anti-bribery policy to further enhance its commitment to ethical practices.

IRCON, being a listed Public Sector Enterprise, conducts and governs itself with the Ethics, Transparency and Accountability policies mandated under SEBI Regulations, the Companies Act, Department of Public Enterprises (DPE) Guidelines, and other policies of the Government of India as applicable from time to time. All these policies cover the Company and its employees and directly/indirectly extend to its subsidiary companies. The Joint Venture Companies have their own set of principles and procedures, broadly in line with the Government's policies.

#### 3. Accessibility of workplaces

# Are the premises / offices of the entity accessible to differently-abled employees and workers, as per the requirements of the Rights of Persons with Disabilities Act, 2016? If not, whether any steps are being taken by the entity in this regard.

IRCON ensures compliance with the Rights of Persons with Disabilities Act, 2016 by designing its office premises in a manner that promotes accessibility and inclusivity for employees and workers with disabilities. The company has implemented various features to achieve this goal. The following are notable features:

- 1. Sensor-equipped Automated Doors: IRCON has installed automated doors with sensors, facilitating easy access for individuals with mobility challenges. These doors automatically open when triggered by the presence of a person, ensuring convenience and smooth entry.
- 2. Lift Facilities: To ensure vertical accessibility, IRCON has installed lifts that adhere to accessibility standards. These lifts enable employees and workers with mobility limitations to effortlessly access different floors of the office building, promoting ease of movement and convenience.
- 3. Provision of Wheelchairs: IRCON provides wheelchairs for employees and workers with mobility challenges. These wheelchairs are available within the office premises and can be used by individuals who require them to move around the workplace comfortably. This provision promotes inclusivity and ensures that employees with mobility limitations can navigate the office environment with ease. A provision for a liaison is made at the premises as per the requirements of the employee.

### 4. Does the entity have an equal opportunity policy as per the Rights of Persons with Disabilities Act, 2016? If so, provide a web-link to the policy.

Yes, IRCON has a specific Equal Opportunity Policy as per the Rights of Persons with Disabilities Act, 2016.

The policy ensures that all employees, regardless of their race, gender, age, disability, religion, or any other protected characteristic, have equal access to employment opportunities, benefits, and advancement. The policy prohibits any form of discrimination, harassment, or bias in all aspects of employment, including recruitment, hiring, training, promotions, compensation, and termination. The policy in line with the Rights of Persons with Disabilities Act, 2016 incorporates accommodations to employees with disabilities, ensuring they have equal access to job opportunities and the necessary support to perform their roles effectively.

Furthermore, the policy incorporates a robust grievance redressal mechanism to address any instances of discrimination faced by individuals with disabilities within the organization.

#### 10. Health and safety management system:

a. Whether an occupational health and safety management system has been implemented by the entity? (Yes/ No). If yes, the coverage of such system?

Yes, IRCON has established and implemented an Occupational Health and Safety (OH&S) Management System in accordance with ISO 45001-2018. The organization has determined the necessary processes

and their application throughout the organization. This includes identifying the inputs and outputs of each process, as well as creating an Inter-relation Matrix to illustrate their relationships. The sequence and interaction of processes have been determined, and criteria and methods, including monitoring, measurements, and performance indicators, have been applied to ensure effective operation and control. Resources have been allocated and made available for the processes, and responsibilities and authorities have been assigned accordingly. Risks and opportunities have been addressed, and processes are regularly evaluated and improved to achieve their intended results. IRCON maintains documented information to support process operations and retains documentation to ensure adherence to planned processes.

### b. What are the processes used to identify work-related hazards and assess risks on a routine and non-routine basis by the entity?

IRCON through their Occupational Health and Safety Manual has established a process for identifying and assessing aspects/hazards, with an assessment mechanism based on their significance. During the initial stage of project execution, major hazards are identified, tabulated, and communicated to the construction team. A comprehensive inventory of all aspects and OH&S hazards are periodically reviewed & updated based on the initial review and group risk assessment. Several factors are addressed, including storage, handling, and disposal of construction & hazardous materials, plant & machinery activities, construction activities & related standard operating procedures, and infrastructure facilities. For OH&S risk assessment, aspects with significant impacts on employee health and safety, such as physical, chemical, and biological factors, are identified. Probability and severity factors are used to rate the assessment, with a scale ranging from "Always" to "Never" for probability and from "Permanent/partial disability with hospitalization or death" to "No harm" for severity. The risk rating is determined by multiplying the probability and severity factors together. If the risk rating is 3 or higher, it is considered intolerable, and control measures should be developed and implemented. The OH&S risk levels are defined as Extreme, High, Moderate, Low, and Trivial based on specific criteria.

### c. Whether you have processes for workers to report the work-related hazards and to remove themselves from such risks. (Y/N)

Yes, following an incident or accident, the Person in Charge of Health and Safety (PH/SO) will initiate an investigation in collaboration with the Sub-contractor's safety officer and other site staff to determine the cause(s) of the incident/accident and suggest appropriate remedial actions. The incident/accident report form will be completed, and the PH/SO will identify the necessary steps to be taken. Furthermore, the Safety Officer will present the report to the Safety Committee and also share it during the Project Quality Council Meeting.

### d. Do the employees/ worker of the entity have access to non-occupational medical and healthcare services? (Yes/ No)

Yes, IRCON ensures that its employees have access to non-occupational medical and healthcare services. The company provides a range of benefits to both permanent and non-permanent employees, including outdoor and indoor treatment reimbursement, sanctions for medical advances, ambulance charges and other complete health checkup benefits. Apart from this IRCON has a medical trust set up that provides assistance to employees under different circumstances.

\*IRCON does not have any workers on its pay-roll, we only have workers through contractors.

#### 12. Describe the measures taken by the entity to ensure a safe and healthy work place.

IRCON takes several measures to ensure a safe and healthy workplace. The company conduct regular hazard identification and risk assessments, including safety drills for various scenarios. Stringent safety measures are in place at project sites to prioritize the well-being of employees and workers. This includes the implementation

of Safety Standard Operating Procedures (SOPs) and comprehensive training programs. Regular pre-medical checkups are conducted at scheduled intervals to monitor the health of personnel. Following the principles of the Industrial Safety hierarchy, the project emphasizes a systematic approach to risk mitigation. The hierarchy involves the steps of elimination, substitution, engineering control and administrative control. Hazards are first eliminated whenever possible, followed by substituting hazardous elements with safer alternatives. Engineering controls are implemented to design a safer work environment, while administrative controls establish procedures and guidelines to manage risks effectively. Finally, when necessary, appropriate PPE is provided to ensure worker safety. Through the consistent application of this safety hierarchy, the project endeavors to identify and address potential hazards, fostering a culture of safety and responsibility throughout the project site.

15. Provide details of any corrective action taken or underway to address safety-related incidents (if any) and on significant risks / concerns arising from assessments of health & safety practices and working conditions.

The following are the corrective actions taken to address safety-related incidents:

- a) Adoption and implementation of staging surrounding every liner driving of pile at the project site Resulting in no cave-in of any workmen during piling work.
- b) Pile load Test Using the "Crown Anchor Reaction Method" that reduces the probability of near miss during execution of pile testing.
- c) Slope stabilization and protection make the execution area safer and more stable during the movement of workmen and machinery. This helps in reducing the chances of fatality and safe working manhours.
- d) Use of sensor base wagon for loading and unloading of ballast.
- e) Awareness through training and competency mapping/ appreciation.

## Principle 4: Businesses should respect the interests of and be responsive to all its stakeholders

#### **Essential Indicators**

#### 1. Describe the processes for identifying key stakeholder groups of the entity.

The process of identifying key stakeholder groups for IRCON encompasses several steps. Initially, it involves clearly defining IRCON's purpose and role within the industry. Subsequently, both internal and external stakeholders are identified, taking into account their respective interests and concerns.

As a listed EPC contractor in the infrastructure sector, there are several key stakeholder groups that are considered, these include investors and shareholders, employees and workers, clients or employers, vendors, sub-contractors, consultants, the community, and the end users of the infrastructure. The selection of client/ employers is typically based on the company's business interests. Vendors, sub-contractors, and consultants are identified and chosen according to project requirements and contract conditions. The responsibility for the end users of the infrastructure facility typically lies with the client/employer, unless the contract provisions allow for involvement by the EPC contractor. Investors, shareholders, employees, and workers are integral parts of the entity itself.

IRCON can successfully understand and engage with stakeholders, effectively addressing their needs and concerns, and cultivating positive relationships through the stakeholder engagement process. Such a strategic approach enables IRCON to optimize project execution, enhance client satisfaction, collaborate effectively with government agencies, and generate value for its shareholders and other stakeholders, thereby achieving improved overall outcomes.

#### 8. Mechanisms to prevent adverse consequences to the complaints in discrimination and harassment cases.

To prevent adverse consequences for complainants in discrimination and harassment cases, IRCON adheres to the POSH policy by

- 1) Providing relief such as the transfer of the aggrieved or the respondent to any other workplace and granting leave to the aggrieved person for up to three months in addition to the entitled leave.
- 2) Ensuring strict confidentiality of complainants' identities and details.
- 3) Implementing robust non-retaliation policies to protect them from reprisals, and establishing whistleblower protection measures for anonymous reporting.
- 4) Conducting independent and unbiased investigations, providing adequate remedies such as disciplinary actions and support for complainants.
- 5) Offering ongoing training and awareness programs.
- 6) Implementing external reporting, and conducting regular reviews and evaluations.

By implementing these steps, IRCON creates a safe and supportive environment for individuals to report complaints, address issues effectively, and prevent adverse consequences for complainants in discrimination and harassment cases.

### 5. Does the entity have a framework/ policy on cyber security and risks related to data privacy? (Yes/No) If available, provide a web-link of the policy.

Yes, IRCON has a comprehensive framework for managing cyber crisis. This plan delineates diverse categories of cyber incidents, along with associated policies, actions, and responsibilities. Its purpose is to effectively prepare for, identify, exchange information about, respond to, and remediate malicious cyber incidents that could potentially impact critical business functions and processes. The plan underscores the necessity of adopting a coordinated and thorough approach to address cyber security incidents and breaches.

This plan draws its foundation from the 'Cyber Crisis Management Plan for countering cyber-attacks and cyber terrorism' formulated by CERT-In, MeitY, Government of India. It acknowledges the dynamic nature of cyber security, wherein technological progress brings forth new vulnerabilities, necessitating periodic updates to

response strategies. Ideally, these updates should occur on an annual basis. The section concerning the nature of cyber crisis and contingencies identifies distinct types of threats and crisis that may target specific objectives. Its objective is to assess the impact of these crisis on critical business functions and services within IRCON, ultimately determining suitable response and mitigation measures.

The plan encompasses various organizational units within IRCON, including the corporate office, regional offices, and project offices. Additionally, it encompasses key business functions such as finance and accounts, human resources management, business development, plant maintenance, contract management, and project management.
